Strategic Insights & Recommendations

1. Category Performance Insights

- Technology generates the highest revenue and maintains strong profit margins, making it the primary value driver.
- Office Supplies delivers stable profitability with balanced sales distribution.
- Furniture shows significantly lower margins and includes loss-making sub-categories such as Tables and Bookcases.
- Profitability varies heavily across sub-categories, indicating pricing and discount sensitivity issues.

2. Regional Insights

- West region leads in both revenue contribution and profit margin performance.
- East follows closely with competitive margins.
- Central region underperforms in margin percentage despite moderate revenue levels.
- Regional margin variance suggests operational or discounting differences.

3. Customer Revenue Concentration

- Total customers: 793
- Top 10 customers contribute only 6.7% of total revenue.
- Revenue distribution is diversified, reducing dependency risk.
- No extreme revenue concentration observed.

4. Strategic Recommendations

- Optimize pricing and discount strategy in Furniture category to improve margin stability.
- Investigate Central region cost structure and discount practices.
- Strengthen retention strategies for high-value Technology customers.
- Develop cross-selling opportunities within high-margin sub-categories.
